RE: Tule Lake Subbasin Webpage – Sustainable Groundwater Management Act (SGMA)

Webpage address: www.tulelakeid.com

We would like to inform you that the Tule Lake Subbasin Groundwater Sustainability Agency (GSA) webpage is now live. As we proceed through development of our Groundwater Sustainability Plan (GSP) you will be able to access all available information via the webpage to keep informed and track status.

If you are interested in receiving notifications for Tule Lake Subbasin GSA/GSP events, such as GSA meetings or developed GSP materials, please visit www.tulelakeid.com and submit your contact information under the “Get Involved” section of the webpage.

In late 2017 Tulelake Irrigation District, Siskiyou County, Modoc County and the City of Tulelake formed our GSA and rolled out initial information to the local community regarding SGMA compliance and our joint strategy to cover the Tule Lake Subbasin. Since that time our consultants have been gathering data and information as well as developing a groundwater model that will provide the necessary foundation for our GSA Core Team to begin development of our GSP facilitated through a public process with local involvement.

That initial outreach included notice and information that the GSA would be adding advisory member roles to the Core Team to bring broader local input to the GSP planning process. Duties of these advisory positions include attending regular meetings; reviewing data and other technical documents; developing projects to be implemented throughout the subbasin; providing input for future management practices; working with other public interests, stakeholders, local, state and federal agencies; and representing public interests.

If you are interested in serving in an advisory role position on the Core Team, please visit www.tulelakeid.com for information and applications. You may also pick up an advisory position application at the Tulelake Irrigation District Office 2717 Havlina Rd, Tulelake, CA 96134.

Please visit www.tulelakeid.com for information and links regarding the Tule Lake Subbasin GSA/GSP and SGMA. If you have questions or issues accessing the webpage contact Kraig Beasly, TID Assistant Manager at (530) 667-2249 or kbeasly.tid@cot.net.

Sincerely,

A handwritten signature in black ink that reads 'Kraig Beasly'.

Kraig Beasly
Assistant Manager
Tulelake Irrigation District
Core Team Representative
