April 24, 2026

## **RE: 2026 DROUGHT CONDITIONS AND INSUFFICIENT IRRIGATION WATER SUPPLY**

Due to the continued drought conditions and confusion regarding the 2026 Klamath Project water supply TID will be holding a **Public Meeting** at the **IREC Ag Extension Conference Building** across the road from the TID office next **Tuesday April 28<sup>th</sup> at 1 PM**. We will talk through the outlook for the 2026 irrigation season and develop district guidelines/policies to try to help all TID patrons plan for the remainder of the season.

**Based on the current status of our water supply there will not be enough for every farm to irrigate every acre sufficiently through harvest. Please strongly consider applying for the 2026 Drought Response Program prior to ordering water and irrigating fields that may work for you to put in the program.**

TID is requesting that each farming operation submit a 2026 Farm Plan which indicates your intended use for each of your farm units this year. At a minimum Plans should include a list of your TID Farm Unit Numbers with crop type and intensions for irrigation and/or Drought Program submission.

In order to provide you with information more quickly and efficiently throughout the year and in the future please provide your farm's desired contact information (e-mail and cell phone number) to TID. You can include this information on your submitted Farm Plan or contact the TID office to be added to the list for email and text notifications.

Thank you,

Brad C. Kirby  
Manager  
Tulelake Irrigation District
